

INTERACTIVE MUSEUM – DIGITAL PLANETARIUM

THE INTERACTIVE MUSEUM

The interactive Museum is a prototype of modern international Science Centre.

Touch, try, have experience for living directly the science. Combine an amazing game and the understanding of phenomena which rules the Universe.

A new approach to one of the most ancient and fascinating sciences, the Astronomy.

A series of exhibits hands-on, interactive and multimedia experiments guide the visitors toward the discover of Universe and its laws: you learn while you're playing.

Pedalling through intergalactic space, jump on the moon, hear the sound of very far objects; these are some of experiences you can live in this museum.

In case of private events is possible make a guided tour with our staff, composed by physic and astrophysic people.

THE PLANETARIUM

The Planetarium projection system is completely digital, one of the first in Europe.

Six projectors managed by a series of computer make possible to travel through the cosmos. There are different shows over a year, and the shows are renewed thanks to the collaboration with important international planetary.

In case of private events is possible choose a particular show.

Wonders of the Universe (Italian or English)

(22 minutes)

A virtual travel from the Big Bang to today between time and space.

Alla scoperta del cielo (Italian only)

(30 minutes)

The sky above Turin, the objects we see and the variations over the season cycle.

Galileo, vedere con gli occhi della mente (Italian only)

(22 minutes)

An ancient and modern album: from the astronomical discovery made by Galileo Galilei thanks to his telescope to the most recent pictures of the cosmos.

It was 1969... (Italian only)

(22 minutes)

The atmosphere and the events which have gone hand in hand with the adventure of the men on the Moon.

STAR COFFEE HOUSE

Into the bar area is possible to taste many things, from a simple sandwich to a dinner with waiters. The bar service, catering and dinner is organized directly with the Star Coffee House management.

federika74@gmail.com

PRESENTATIONS AND MEETING

In the Planetarium hall is possible to perform conferences, presentations and meeting, also with projections audio and video directly on the dome.

Technical data: maximum hall capacity 98 people and the Infini.to Staff.

OBSERVATIONS

Infini.to offers, with the expert guide of our Staff and our new telescopes, the possibility to observe the stars, which today are almost hidden by the light pollution of the cities. Using the right instruments we can see the most fascinating objects like double stars, planetes, nebule and more over.

The scheduled time for the observations will vary over a year.

INFO:

Infini.to is accesible leaving the cars or the bus in tha car park in via Osservatorio n°8.

Is possible to use public transport: the bus n° 30 of GTT lines starts in the centre of Turin and take you to the bus stop “osservatorio”; then you go along via Osservatorio until you reach the car park (5-10 minutes).
